PLANET EARTH Structure

The Planet Earth was launched in the Fall of 2000 as the Ethnic Module taking over the throne from the Proteus 3. E-Mu's sound designers gathered an amazing collection of authentic rhythms and traditional instruments from the four corners of the globe to give you Planet Earth, the most realistic ethnic sound module in the world. Planet Earth contains a wide range of world samples - from Africa to Brazil and is the professional's choice for World sounds and ethnic percussion! Discover Planet Earth and bring a world of sounds to your music.

Also available:

www.DigitalSoundFactory.com has exclusive license to re-master existing instrument libraries created for E-MU and Creative platforms, and to create brand new libraries from recording sessions that have never been published. DSF libraries provide the opportunity to experience these world-renowned sounds on your computer.
