

www.DigitalSoundFactory.com

XTREME LEAD-1 Structure

Xtreme Lead was launched in spring 2000 as the Techno/Electonica Module in the new Proteus '1000' range. From classic synthesizers to drums and to loops and worms, this sound bank covers it all! Even a lawn mower. An amazing 1210 sampled waveforms are contained in this electronic collection. Four folders are included and contain the patch files for each of the four banks from the hardware sound module.

Also available:

www.DigitalSoundFactory.com has exclusive license to re-master existing instrument libraries created for E-MU and Creative platforms, and to create brand new libraries from recording sessions that have never been published. DSF libraries provide the opportunity to experience these world-renowned sounds on your computer.
